THE 2012 WORLD CO-OPERATIVE MONITOR

EXPLORING THE CO-OPERATIVE ECONOMY

As the International Year of Co-operatives draws to a close, this is an opportune time to reflect on an exciting year full of opportunities and initiatives that celebrate organisations, in which co-operative members, who own and govern a business, collectively benefit.

Scalability, value-based sustainability, and democracy are the three key messages utilised to promote a model of business that supports the social and economic development of economies, communities, and individuals around the world.

Throughout this year, the International Co-operative Alliance (ICA) has promoted and supported a large number of initiatives. As the global voice of co-operatives, ICA determined that the International Year of Co-operatives also presented the perfect opportunity to collect data on the largest co-operatives in the world.

ICA has since 2006 periodically published the Global300, a list of the 300 largest co-operatives in the world. In 2011, ICA expanded the list to include sectoral analysis.

Thanks to the support of Crédit Coopératif, the Desjardins Group, the Indian Fertiliser Cooperative Limited (IFFCO), Organização das Cooperativas Brasileiras (OCB), and The Co-operative Group, ICA has now partnered with the European Research Institute on Cooperative and Social Enterprises (Euricse) to re-launch the Global300 in 2012 as the World Co-operative Monitor.

Euricse, which since its founding has been committed to promoting knowledge about co-operative organisations, believes strongly in the need to monitor co-operatives and to continue the work begun with the Global300.

The goal is to move beyond the largest 300 and beyond the measure of annual turnover. To accomplish this, ICA will be partnering with other co-operative lists, by country and sector, sharing data where possible and making it available to the co-operative community. This report presents the results of the first edition of the World Co-operative Monitor on the largest co-operatives using 2010 data. This report is intended to be exploratory and does not attempt to be all-inclusive; rather, it is an overview of a significant part of the worldwide co-operative movement.

ICA GLOBAL300

MAPPING THE WORLD'S LARGEST CO-OPERATIVES

Launched by ICA at the Forum for a Responsible Globalisation held in 2006 in Lyon, France, Global300 brings together economic information about the 300 largest co-operatives and mutuals in the world.

The project, stemming from awareness at the ICA that greater recognition of the economic importance of a productive sector depends also on the availability and level of dissemination of data on that sector, intends to promote the role and importance of co-operatives worldwide, particularly economically. The focus of the project is to issue a global ranking, based on revenues, of the largest co-operative and mutual enterprises in the world.

ICA recognizes that the co-operatives taken into account in the Global300 ranking are just the “tip of the pyramid” of the co-operative sector; however, ICA believes strongly in the potential of the project. The rankings in fact not only promote the visibility of the co-operatives included, but help ICA to show the world that there is an alternative business model to the shareholder model prevailing today. The Global300 ranking provides financial data that proves that co-operatives are successful businesses which contribute in real terms to economic stability and sustainable development.

The project also prompted national federations of co-operatives to develop country rankings, which has led to a growing awareness of the economic size of the co-operative sector in many countries around the world.

Since 2006, ICA has published periodically updated lists, representing a first attempt to monitor the evolution of the economic dimensions of the largest co-operatives in the world.

The last list was published in 2011, in conjunction with the launch of the United Nations International Year of Co-operatives in New York, and presents data on the top 300 co-operatives and mutuals in the world as of 2008, with collective revenues of USD 1.6 trillion.

FROM THE GLOBAL300 TO THE WORLD CO-OPERATIVE MONITOR

MONITORING THE ECONOMIC AND SOCIAL IMPACT OF CO-OPERATIVES

In 2012, ICA took a further step forward in its analysis of the largest co-operatives in the world.

Starting from the results achieved thus far with the Global300, and with the scientific and technical support of Euricse, ICA launched a new project: The World Co-operative Monitor.

The idea behind this new project is to define a new process of data collection, integration, and analysis, culminating in the creation of a regularly updated database containing economic, but also employee and other social data, to monitor and demonstrate not only the economic, but also the social impact of the largest co-operatives worldwide.

The database is expected to be useful in strengthening ICA's role in building networks of global co-operative leaders. It also has the potential to lead and coordinate global, regional, and national initiatives on data collection and evidence-based policy and advocacy. Finally, development of this database will further address ICA's strategic objective of promoting co-operatives as a special values-based business model; by building a co-operative business intelligence service for analysis and benchmarking performance, not only in financial terms, but also in terms of co-operative values and principles.

The project is based on greater involvement of federations and other organisations that collect and analyse data on co-operatives and produce local or sectoral rankings, and of co-operatives capable of providing more detailed data on the social dimension of business.

In summary, the project aims to achieve, within a few years, a number of objectives, including:

- » Raising the profile of co-operatives within their own industries and countries, as well as internationally;
- » Demonstrating the economic and social importance of co-operatives and mutuals to government and regulatory agencies;
- » Modelling good practice and highlighting successful co-operative business models and innovative approaches and;
- » Creating networks between co-operatives and mutuals within the World Co-operative Monitor for greater sharing of information, business intelligence, and business opportunities.

This year (2012) was dedicated to establishing the working group, developing tools for data collection, and performing a pilot study.

In particular, to give greater scientific basis to the project, ICA and Euricse established a scientific committee consisting of Euricse researchers and other international experts with a variety of training and skills (including statistics, accounting and business administration, economics, and sociology) who over time have developed particular interest in co-operatives and have extensively studied this topic, both nationally and internationally.

The working group focused on collecting data on:

- » Co-operatives, understood as autonomous associations composed mainly of persons united voluntarily to meet their common economic, social, and cultural needs and

aspirations through a jointly-owned and democratically-controlled enterprise.

- » Mutual organisations, understood as private co-operative-type organisations providing insurance or other welfare-related services. Also considered micro-insurance and mutuals with both voluntary and compulsory membership.
- » Co-operatives composed mainly of co-operatives/mutuals that carry out an economic activity for the production of goods or the provision of services of common interest for their members.
- » Non-co-operative enterprises in which co-operatives have a controlling interest, in order not to underestimate the overall impact of co-operative organisations.

Furthermore, starting from the data with which the research team has been provided, there may also be groups of co-operatives that are closely related to each other in both their definition of strategies and their performance of various activities. The research team collected data about groups of co-operatives mainly in the banking sector. In the coming years, data collection will be progressively extended to groups of co-operatives in all sectors of activity.

In selecting data collection tools, ICA and Euricse have pursued a dual strategy, defining, on the one hand, a system for collecting data online on the largest co-operatives in the world directly from those co-operatives, and on the other, an integration process to create a single database from existing databases and other data collected by national associations, research institutes, and other organisations.

Between these two paths, integration of the existing databases presents fewer problems, mainly due to the interest and willingness to work with ICA and Euricse shown by several federations and associations, in various countries, that collect data on co-operatives.

Online data collection presents the greater challenge, especially given the need to spread among the individual co-operatives the objectives of the project and the need

to ensure that co-operatives take ownership, realizing that greater availability and variety of data can lead to achievement of the objectives of visibility and, above all, recognition of the importance of the co-operative sector described above. Achieving this objective will, in the medium- to long-term, yield the desired outcome and add value to the project. Achieving this goal will depend mainly on the active participation of co-operatives in the project and their availability, understanding the importance of the project, to share their economic and social data with the World Co-operative Monitor Research team.

To facilitate the collection of online economic and financial data, an online questionnaire was developed by the Euricse working group, under the supervision of the Scientific Committee. After a period of experimentation, consisting of an initial online registration and a second online questionnaire related to deepening the economic, financial, and social data, the final questionnaire was released.

The questionnaire, available in English and Spanish, is addressed directly to co-operatives with the aim of collecting economic and social data, and exploring other issues relating to organisational structure and the co-operative principles set out in ICA's declaration of co-operative identity.

THE WORLD CO-OPERATIVE MONITOR

EXPLORATIVE FINDINGS FOR 2010

The first pilot study of the World Co-operative Monitor was carried out with the aim of collecting economic and social data on the world's largest co-operatives as of 2010. Both strategies outlined in the previous section were launched on an experimental basis.

Through the system of online data collection, a limited number of questionnaires were received. The data for the first strategy is therefore still small in number, albeit encouraging.

Other data were derived from the existing international lists and databases of local federations all over the world, integrated with the Amadeus database of Bureau van Dijk about European co-operatives, with a turnover of over USD 100 million in 2010. The World Co-operative Monitor team collected data provided by the following:

- » Building Societies Association, UK
- » Centro Studi Legacoop, Italy
- » CEPES - Confederación Empresarial Española de Economía Social, Spain (Informe de la Economía Social Española 2010-2011)
- » Confecoop - Confederación de Cooperativas de Colombia, Colombia (EscalaFón Cooperativo)
- » Coop FR - les entreprises cooperatives, France (Panorama sectoriel des entreprises coopératives - Top 100 des entreprises coopératives 2012)
- » Co-operatives Australia, Australia (Australia's Top 100

Co-operatives, Credit Unions and Mutuals by Annual Turnover)

- » Co-operatives UK, UK (The Co-operative UK 100)
- » Euro coop - European Community of Consumer Co-operatives and CCW - Consumer Co-operatives Worldwide
- » Federcasse, Italy
- » Government of Canada - Rural and Co-operatives Secretariat, Statistic Unit, Canada (Top 50 Non-financial Co-operatives in Canada in 2010)
- » iCOOP Korea, Republic of Korea
- » ICMIF - International Cooperative and Mutual Insurance Federation (ICMIF Global500)
- » JCCU - Japanese Consumer Japan (Top 10 Retail Co-ops in Japan)
- » Melhores e Maiores Empresas and E-Coop Research Program on Cooperatives Organizations FEA RP USP, Brazil
- » NCB - National Consumer Cooperative Bank, USA (NCB Co-op 100)
- » New Zealand Cooperatives Association, New Zealand (Top 40 New Zealand Cooperatives & Mutuals)
- » UCECOM - National Union of Handicraft and Production Cooperatives of Romania, Romania

Given the greater availability of data at the European level, due both to existing rankings and to the availability of the Amadeus database, the research team reports a possibly higher coverage of Europe than of the rest of the world. The future goal of the project is to ensure adequate coverage of all continents.

In the following pages, summary data of the main co-operative sectors are analysed, and a list of the largest co-operatives in each individual sector is presented.

Provisionally for this year, given the still limited availability of questionnaires, the rankings presented are purely economic in nature (See Appendix 3).

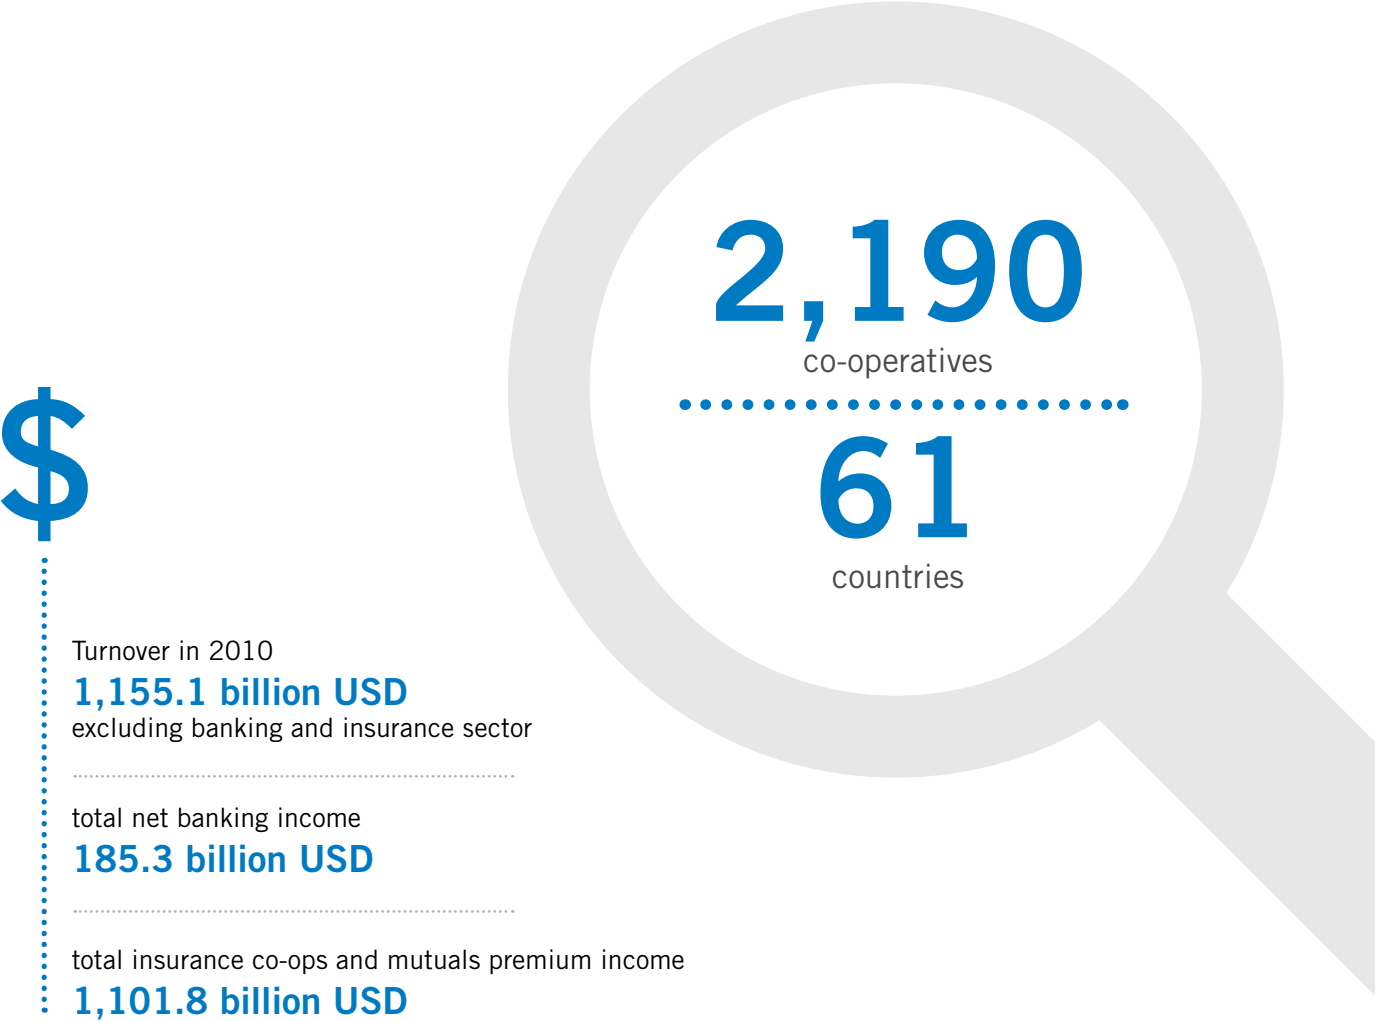

All values are expressed in US dollars. Conversion to US dollars is based on the exchange rates from December 31st, 2010.

The list of countries is based on the United Nations' 'Standard Country or Area Codes for Statistical Use' classification.

The results presented below are to be considered as exploratory, not exhaustive. Results are presented by sector of activity. The classification proposed is to be considered as a first attempt of classification that can be improved in future editions of the project.

In future editions of the project, collected data will be progressively improved in order to integrate more social data as criteria in the assessment of the size of co-operatives.

AGRICULTURE AND FOOD INDUSTRIES

The agriculture and food industry groups together all co-operatives that operate along the entire agricultural value chain, starting from the cultivation of agricultural products and livestock farming to the industrial processing of agricultural products and animals. This sector includes both agricultural producers' co-operatives and consortia of co-operatives, or similar arrangements, to carry out for members the processing and marketing of agricultural goods.

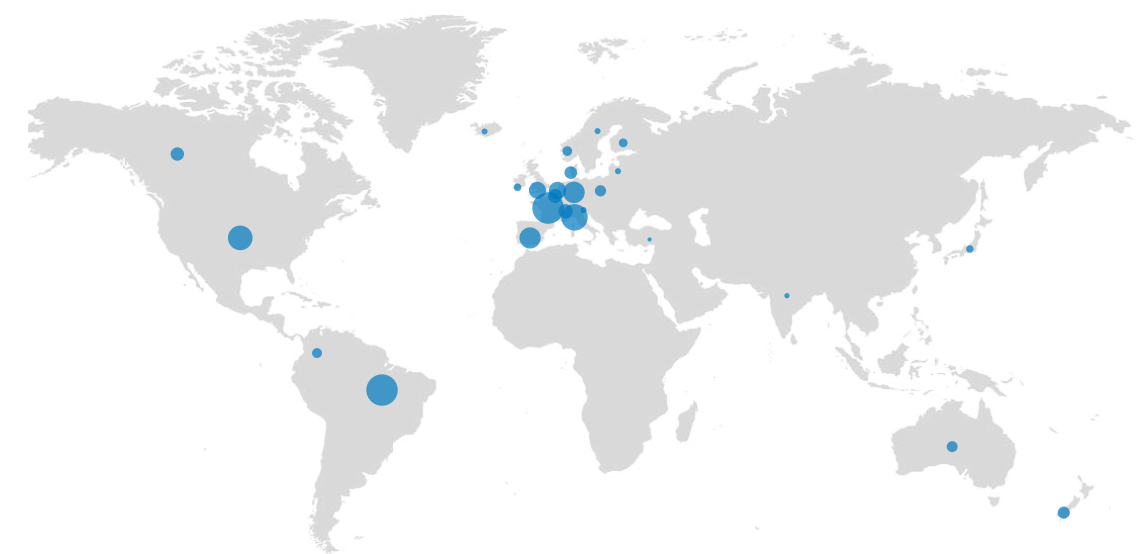

Overall, data was collected for **553 co-operatives** distributed in **36 countries**, with a total turnover in 2010 of **483.2 billion** US dollars.

F.7 CO-OPERATIVES IN THE AGRICULTURE AND FOOD INDUSTRIES SECTOR

Looking at co-operatives with a turnover of over 100 million USD, there are **411 co-operatives** distributed in **26 countries**, with a total turnover of **477 billion** US dollars.

CONSUMER AND RETAIL
CO-OPERATIVES

This sector includes co-operatives formed to purchase and supply goods and services at competitive conditions in the interest of members (retailers or consumers). The sector also includes purchasing co-operatives established among firms to aggregate demand to obtain lower prices, in particular to reduce the cost of raw materials and energy.

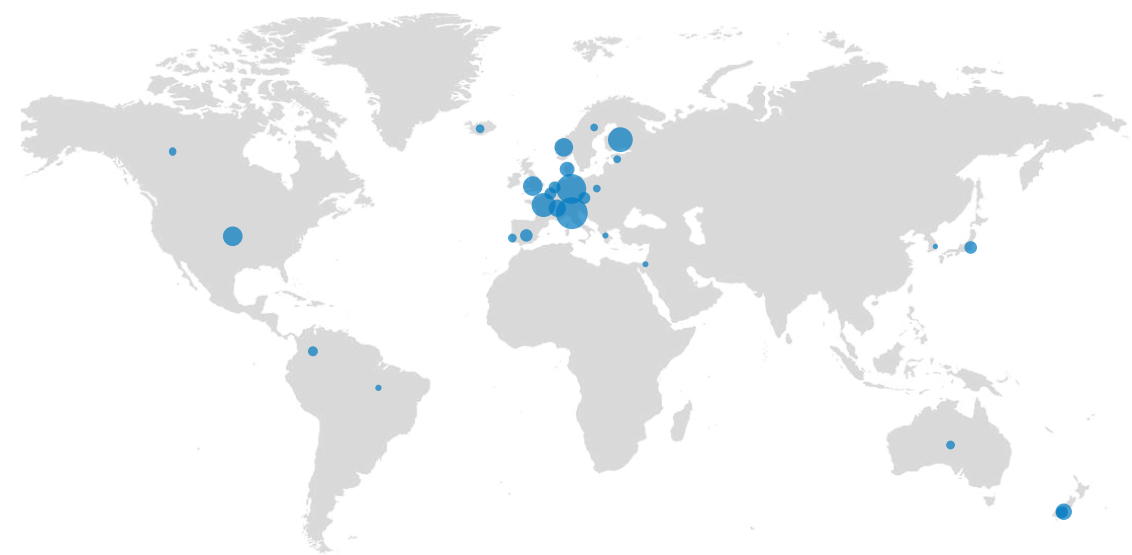

Overall, data was collected for **429 co-operatives** distributed in **38 countries**, with a total turnover in 2010 of **539.5 billion** US dollars.

F.9 CO-OPERATIVES IN THE CONSUMER AND RETAIL SECTOR

Looking at the co-operatives with a turnover of over 100 million USD, there are **274 co-operatives** distributed in **29 countries**, with a total turnover of **536.2 billion** US dollars.

THE PAST AND THE PRESENT

USING THE WORLD CO-OPERATIVE MONITOR DATA TO IDENTIFY THE TOP 300 GLOBAL CO-OPERATIVE AND MUTUAL ORGANISATIONS

As mentioned in the previous sections about the World Co-operative Monitor, ICA -with the support of Euricse - aims to create a system to monitor, over time, the economic performances of the largest co-operatives in the world, along with other important aspects, such as employees, number of user services, and types of services offered.

An interesting exercise will be now performed: applying the Global300 methodology to data collected by the World Co-operative Monitor in an effort to identify the top 300 co-operatives and mutuals in terms of revenue. Results of this exercise have to be considered carefully, keeping in mind that different economic indicators have been used for different types of organisations (net banking income for banks, premium income for insurance co-operatives and mutuals, and turnover for the others co-operatives). The list, published in Appendix 1, presents the economic value recorded for each organisation, the sector of activity, and the presence or absence of the organisation in the last Global300 ranking published by ICA.

TOP
300

24 countries

total turnover (including banking and insurance sector)
1,975.6 billion USD

banking and financial services
158.7 billion USD

insurance co-ops and mutuals
977.2 billion USD

Some data about the
top 300 co-operative
and mutual organisations

F.22 TOP 300 CO-OPERATIVE AND MUTUAL ORGANISATIONS BY SECTOR OF ACTIVITY

THE FUTURE

LAUNCH THE WORLD CO-OPERATIVE MONITOR ON THE WEB

Starting from the Global300 experience, the World Co-operative Monitor project aims to improve the methodology for data collection and integration. The first result of this renewed effort is the pilot study based only on an economic criterion presented in this explorative report.

This is only the first step in achieving the final goal of the World Co-operative Monitor.

In fact, the World Co-operative Monitor will not be limited to this – its main goal is to give visibility to the largest co-operatives, in terms of economic and/or social impact, in their countries.

The World Co-operative team, therefore, intends to gradually collect data that can describe how the largest co-operatives in the world contribute to the welfare of the countries in which they operate in terms of employment, facilities, etc.

It is an ambitious project that ICA and Euricse will bring forward together, trying to involve more and more federations and local representatives, confident that increased availability of data is a good starting point for a greater recognition of the importance of the co-operative movement.

The success of the project cannot, however, ignore the contribution of co-operatives. Co-operatives can actively participate in the project, first by completing the questionnaire at www.monitor.coop/quest, which is presented in the appendix to this report. Second, it can spread the word and

contribute to the wider dissemination of the project.

ICA and Euricse, aware of the opportunity that visibility of the project can provide for single co-operatives that decide to take part, intend in the coming months to develop www.monitor.coop, a website dedicated to the World Co-operative Monitor, where users can browse to find all the co-operatives in the World Co-operative Monitor database and consult the main information.

www.monitor.coop

APPENDIX 1

THE 300 LARGEST CO-OPERATIVE AND MUTUAL ORGANISATIONS

RANK	ORGANISATION	TURNOVER BILLION USD	COUNTRY	SECTOR OF ACTIVITY	SOURCE	INDICATOR	YEAR2008 GLOBAL300

I = Net banking income // **P** = premium income // **T** = turnover

APPENDIX 2

STRUCTURE OF THE WORLD CO-OPERATIVE MONITOR QUESTIONNAIRE

The World Co-operative questionnaire can be completed online at www.monitor.coop/quest

Part 1. General information

- » Organisation details (name, address, website)
- » Country
- » Chief Executive Officer
- » Organisation type (co-operative, mutuals, co-operative of co-operatives)
- » Co-operative type (worker, producer, consumer etc...)
- » Sector of activity

Part 2. Social data

- » Number of members
- » Number of individual and corporate entity members
- » Percentage of female and youth members
- » Percentage of co-operative, mutual and other company members
- » Average number of employees
- » Percentage of female and youth employees
- » Number of volunteers
- » Number of subjects who benefited from services or products of the organisation

Part 3. Economic data

- » Turnover
- » Total assets
- » External funds
- » Net interest income
- » Total operating costs
- » Profit (loss) for period
- » Staff costs
- » Total fixed assets
- » Equity
- » Annual report
- » Other non-financial reports

APPENDIX 3
ECONOMIC INDICATORS

In recent years, the international scientific debate has been focused on the identification of indicators that can be used to effectively evaluate the economic performance of co-operatives, while also allowing for global comparisons (Beaubien and Rixon, 2012; Beaubien, 2011; López-Espinosa et al., 2009; Marin-Sanchez M., Melia-Martí E., 2006). Following a discussion of the members of the Scientific Committee, the World Co-operative Monitor team agreed that the analysis of the economic performance of cooperative and mutual organizations cannot be separated from the analysis of their social impact, given the specific nature and goals pursued by such organizations.

However, the research team encountered several difficulties in data collection, which prevented the conduction of a comprehensive analysis. Against this background, the rankings of the largest cooperative and mutual organizations of this first edition are based only on an economic criterion. The Scientific Committee, supported by the research team, considered **turnover** as a measure of the economic performance. The turnover is defined as the income generated by the business activities conducted by a company, usually the sale of goods and services to customers.

This concept was adjusted according to the type of activity conducted by the studied cooperative and mutual organizations. For mutual and co-operative insurance organisations the turnover is represented by their **income on premiums**, in terms of revenue generated by the premiums paid by customers. For co-operative banks the choice was wider, given the variety of services supplied.

Drawing on the literature, after an in-depth analysis (Hahna and O'Brien, 2012; Maudos and Solís, 2009; Lileikiene and Likus, 2011; Andersen et al., 2012; Saunders and Schumacher, 2000; Demirgüç-Kunt et al., 2004; Ho and Saunders, 1981), the research team agreed to use the **net interest income**, understood as the difference between interest income and interest expenses, as an indicator of turnover. This margin also allows for the comparability of data at an international level since it standardises parameters. In addition, an analysis conducted by the research team on a sample of co-operative banks' annual reports from different parts of the world confirmed that, despite significant differences in the financial statements analysed, net interest income is always included. The choice of this indicator was thus supported also by the availability of data in official financial documents. Nevertheless, local rankings integrated in the database use a different indicator, which is similar to the net banking income and refers to the difference of the total interest income plus other banking incomes (i.e. dividends, net revenues for services, profits from financial transactions) and interest expenses plus other banking costs (i.e. fees and commissions, losses from financial transactions). Having said this, the research team was forced to rely on the net banking income as criterion for co-operative banks. This indicator, although it is not considered the best option for performance evaluation in the banking sector, allows for data comparability in light of the vision and purposes of the WCM.

Values slightly vary from country to country owing to limitations in data collecting. The table below lists national rank-

ings, and specifies the indicators used.

The research team is aware of the limitations caused by the use of different indicators when comparing different types of co-operatives. For this reason, sectoral rankings are presented in this report. Comparisons among co-operatives in different sectors should be made with due caution, keeping in mind that the economic values presented are ordered according to different parameters.

The top 300 list presented in appendix 1 reflects the limitations expressed above. It does not represent the focus of the World Co-Operative Monitor Project but it provides a link between Global 300 and the World Co-Operative Monitor.

COUNTRY	ORGANISATION	RANKING	INDICATOR
AUSTRALIA	Co-operatives Australia	Australia top 100	Annual Turnover
CANADA	Government of Canada - Rural and Co-operatives Secretariat, Statistic Unit	Top 50 Non-financial Co-operatives in Canada in 2010	Total revenue
COLOMBIA	Confecoop	Escalafón Cooperativo	Ingresos
FRANCE	Coop FR	Panorama sectoriel des entreprisescoopératives - Top 100 des entreprisescoopératives 2012	Chiffred'affaires
NEW ZEALAND	New Zealand Cooperatives Association	Top 40 New Zealand Cooperatives &Mutuals	Annual Turnover/Revenue
SPAIN	CEPES	Informe de la Economía Social Española 2010-2011	Facturación
UNITED KINGDOM	Co-operatives UK	The Co-operative UK 100	Turnover
USA	NCB	NCB Co-op 100	Total revenue
INTERNATIONAL RANKING	ICMIF	ICMIF Global 500	Premium income

TEAM & STEERING COMMITTEE

THE WORLD CO-OPERATIVE MONITOR TEAM & STEERING COMMITTEE

TEAM

CHIARA CARINI
European Research Institute on Cooperative and Social Enterprises (Euricse)

ERICKA COSTA
University of Trento (Italy) and European Research Institute on Cooperative and Social Enterprises (Euricse)

ALEX RIGOTTI
European Research Institute on Cooperative and Social Enterprises (Euricse)

STEERING COMMITTEE

MICHELE ANDREAUS (Ph.D. in Business Economics, University of Venice, Italy) is Full Professor of Business Administration, Accounting and Social Accounting at the University of Trento (Italy), and since September 2008 has been the Head of the Department of Computer and Management Sciences (DISA).

CARLO BORZAGA is Professor of Economic Policy at the University of Trento (Italy), Faculty of Economics. He is currently the President of Euricse – European Research Institute on Cooperative and Social Enterprises – and chairs the Master’s Programme in Management of Social Enterprises (GIS) at the University of Trento.

MAURIZIO CARPITA is Full Professor of Statistics at the University of Brescia (Italy) and Director of the Research Center ‘Data Methods and Systems’ at the University of Brescia.

PANU KALMI (Ph.D.) is a Professor of Economics at the University of Vaasa (Finland), and is a member of the Academic Think-tank of the European Association of Co-operative Banks.

LOU HAMMOND KETILSON (Ph.D.) is Director of the Centre for the Study of Cooperatives, an interdisciplinary teaching and research unit, and Professor at the Edwards School of Business, University of Saskatchewan (Canada).

AKIRA KURIMOTO is Director of the Consumer Co-operative Institute of Japan and Managing Director of the Robert Owen Association. He served as Chair of the ICA Research Committee (2001–2005) and is Vice Chair of the ICA Asian Research Committee.

SIGISMUNDO BIALOSKORSKI NETO is Full Professor and Academic Coordinator of the Cooperatives Organizations Study Program and of the Center for Organization Studies. He is also a member of the ICA Research Committee. Professor Neto is Director of the Department of Business Administration and Accountancy in the Faculty of Economics of the University of São Paulo at Ribeirão Preto (Brazil).

SONJA NOVKOVIC is a Professor of Economics at Saint Mary’s University (Canada). Currently, she is the Academic Co-lead of the Measuring the Co-operative Difference Research Network (MCDRN) with the Canadian Co-operative Association.

STEERING COMMITTEE

ELIANE O'SHAUGNESSY is Strategic Advisor, Office of the President of Desjardins Group, and a member of the organizing committee of the 2012 Quebec International Summit of Cooperatives.

GREG PATMORE is Professor of Business and Labour History and Director of the Business and Labour History Group and the Co-operative Research Group in the School of Business, The University of Sydney (Australia). He also chairs the School's Ethics Committee.

GOPAL N. SAXENA at present is a member on the Board of IFFCO and is the Head of Board, Shares and Cooperative Services Departments at Head Office, New Delhi. He obtained M.Sc (Statistics) degree from University of Rajasthan, Jaipur and Ph.D for his work in Mathematical Statistics.

He joined IFFCO on 11.09.1971 and worked in various capacities. He has Specialization in Cooperative Laws including interpretation of Bye-laws & Cooperative Acts.

BARRY W. SILVER has been working as an Executive Vice President at the National Cooperative Bank in Washington, DC, for over three decades in the Corporate Lending Division. Barry has an M.B.A. from American University and has been a cooperative financial consultant for the World Bank and USAID in China and South America. He has a total of 35 years' experience working with co-operatives.

FREDRICK O. WANYAMA is an Associate Professor of Political Science and Director of the School of Development and Strategic Studies at Maseno University (Kenya). He has served as a consultant for the ILO on many projects on co-operatives and the social economy in Africa.

PROMOTERS

INTERNATIONAL
CO-OPERATIVE
ALLIANCE (ICA)

WWW.2012.COOP

The International Co-operative Alliance is an independent, non-governmental association which unites, represents and serves co-operatives worldwide. Founded in 1895, ICA has member organisations in 100 countries active in all sectors of the economy. Together these co-operatives represent nearly one billion individuals worldwide.

EUROPEAN RESEARCH INSTITUTE
ON COOPERATIVE AND SOCIAL
ENTERPRISES (EURICSE)

WWW.EURICSE.EU

The mission of the European Research Institute on Cooperative an Social Enterprises is to promote knowledge development and innovation for the field of co-operatives, social enterprises and other non-profit organizations engaged in the production of goods and services. The Institute aims to deepen the understanding of these types of organizations and their impact on economic and social development, furthering their growth and assisting them to work more effectively. Through activities directed toward and in partnership with both the scholarly community and practitioners, including primarily theoretical and applied research and training, we address issues of national and international interest to this sector, favouring openness and collaboration.

SPONSORS

MADE POSSIBLE BY THE SUPPORT OF OUR SPONSORS

Crédit Coopératif
www.credit-cooperatif.coop

Group Crédit Coopératif holds a very special position among French banks. It was created at the end of the 19th century by co-operators who wanted better access to credit, as traditional banks were not willing to finance their projects. As a grassroots group that has remained close to its customers, but also reactive through various partnerships, Groupe Crédit Coopératif relies on a national co-operative bank, Crédit Coopératif, whose capital shares are owned by its members. The latter are essentially legal entities, firms and non-profit organizations. The Board is composed of their elected representatives, allowing Crédit Coopératif to maintain close ties with its customers and their organizations.

Desjardins Group
www.desjardins.com

Desjardins Group is the leading co-operative financial group in Canada with assets of close to \$200 billion. Drawing on the strength of its caisse networks in Québec and Ontario, and its subsidiaries across Canada, it offers a full range of financial products and services to its 5.6 million members and clients. Desjardins specializes in Wealth Management

and Life and Health Insurance, Property and Casualty Insurance, Personal Services and Business and Institutional Services. Desjardins ranked 18th among the World's Safest Banks (Global Finance, half-yearly update, 2012). It was awarded 'Best Corporate Citizen in Canada' in 2012 and was ranked among Canada's Top 100 Employers in 2012. Desjardins is supported by the skills of its 44,645 employees and the commitment of nearly 5,400 elected officers. Desjardins proudly co-hosted the Quebec 2012 International Summit of Cooperatives with the International Co-operative Alliance and Saint Mary's University (www.2012intlsummit.coop).

IFFCO
www.iffco.coop

IFFCO is one of the largest producers and marketers of fertiliser in the world, with a turnover of \$5,004 million in 2011–2012. It is a cooperative society that is wholly owned by its member societies. It has a vast marketing network of 40,000 cooperative societies reaching more than 55 million farmers in India. IFFCO routes its products through its cooperative channels. Today, IFFCO has 19 associates and subsidiaries under its wing, and covers a variety of sectors like general insurance, power generation, knowledge services, SEZ and mining, in

addition to its core business of fertilizers. It has joint ventures outside the country with JIFCO (Jordan), KIT (Dubai), OMIFCO (Oman), ICS (Senegal), Growmax Agri Corp. (Peru and the Americas), Petrogas Inc. (Argentina) and most recently, IFFCO (Canada).

In India, it has IFFCO Power – ICPL, IFFCO Kisan SEZ, IFFCO Sanchar – IKSL, IFFCO Insurance – IFFCO – Tokio, Rural Development – CORDET, Forest Development –IFFDC, Community Service – Kisan Seva Trust, IFFCO Foundation and IPL – Potash. IFFCO also emphasizes energy conservation and the use of alternative energy resources. IFFCO is committed to the farmers of India and will continue to surpass its previous records to emerge as the global leader in both the production and marketing of fertilizers.

OCB
www.ocb.org.br

Cooperative movement is an entrepreneurial force generating employment, income and social inclusion. It promotes the sustainable development of communities and democratic management in which all participate and seek the common good. Today, it mobilizes 1 billion people worldwide and 33 million Brazilians.

The movement is officially represented in Brazil by OCB System and is constituted by the Organization of Brazilian Cooperatives (OCB), the National Service of Cooperative Learning (Sescoop) and the National Confederation of Cooperatives (CNCoop), and 27 other state organizations all operating with different, yet complementary focuses for the development of cooperatives.

The OCB is the political and representative branch, responsible for the promotion, support and defence of cooperatives at all political and institutional levels in Brazil and abroad.

To promote competitiveness and growth in the industry, the organization develops strategic services and other actions like registration of cooperatives and business intelligence. SESCOOP is the institution promoting cooperative education. Operating since 1999, it aims to integrate the cooperative movement, helping it to overcome the challenges that come with being sustainable. SESCOOP focuses on vocational training, social promotion and monitoring. CNCoop is the representative organ of the confederation of cooperatives, and consists of federations and trade unions. Its main mission is to represent and defend rights and interests, both individual and collective, within every economic sector and category in the judicial and extrajudicial fields throughout the whole national territory.

The co-operative

The Co-operative Group
www.co-operative.coop

The Co-operative Group is the UK's largest consumer co-operative, offering a wide range of services including food, financial services, pharmacy, funerals, legal services, motor vehicles and electrical goods. The Group has over 7 million consumer members, generates an annual turnover of over £13bn, employs over 100,000 people, operates over 5000 retail outlets and serves more than 21 million customers each week.
